SUMMARY

Highly motivated B.Tech Computer Science (AI) student with hands-on project experience in developing scalable engineering solutions and AI-integrated software. Proficient in Python, C++, and JavaScript, with a strong foundation in data structures, algorithms, and software design principles. Demonstrated expertise in solving complex problems through 85+ LeetCode challenges and active contributions to open-source projects like GSSoC and SWOC. Eager to apply knowledge of distributed systems, concurrency, and multi-threading to build high-performance applications at scale. Committed to fostering a culture of innovation while optimizing system reliability and performance through rigorous debugging and systems data analysis.

EXPERIENCE

1. Competitive Programmer & DSA Practitioner

2025 – Present

LeetCode & HackerRank

- Solved 85+ problems on LeetCode covering Binary Trees, Dynamic Programming, Graphs, Sorting Algorithms, and Hashing to optimize time and space complexity.
- Earned HackerRank 5-Star Golden Python Badge and 3-Star Silver Badge in Problem Solving by applying advanced data structures and algorithms.

2. Open Source Contributor

May 2026 – Present

GirlScript Summer of Code (GSSoC'26)

- Collaborated on large-scale systems by contributing to community-driven open-source projects using Git workflows and pull request management.
- Implemented frontend enhancements and resolved complex bugs, ensuring software design consistency and improved system reliability across distributed repositories.

3. Open Source Contributor

Jan 2026 – Mar 2026

Social Winter of Code (SWOC)

- Successfully merged multiple pull requests into production-level repositories, focusing on UI usability and performance optimization.
- Applied knowledge of software engineering principles to collaborate across teams and evaluate results for effective issue resolution in a fast-paced environment.

EDUCATION

1. Bachelor of Technology in Computer Science (Artificial Intelligence)

2025 – 2029

Pranveer Singh Institute of Technology, Kanpur (CGPA: 8.86/10)

SKILLS

Programming:

Python, C, C++, JavaScript, Java, Go, TypeScript, SQL

Core CS &

Systems:

Data Structures, Algorithms, Distributed Systems, Concurrency, Multi-threading, Synchronization

Technologies:

Next.js, HTML5, CSS3, Firebase, MongoDB, RESTful APIs, Git, GitHub

AI &

Analysis:

Machine Learning, LLMs, Systems Data Analysis, Visualization Tools, Debugging, Performance

Methodologies:

Software Design, Object-Oriented Programming, Agile, Open Source, Scalable Engineering

PROJECTS

1. Career Compass - AI-Integrated Career Platform

Technologies: Next.js, TypeScript, MongoDB, Firebase, RESTful APIs

- Designed and deployed a scalable engineering solution for career guidance, utilizing AI to provide personalized recommendations and learning roadmaps.
- Architected a complex system with responsive Next.js components and integrated Firebase for real-time data handling and system reliability.
- Analyzed user information to evaluate and choose the best algorithmic solutions for institution recommendations based on career goals.

2. Python GUI Calculator

Technologies: Python, Tkinter, Software Design Patterns

- Developed a high-performance desktop application using event-driven programming and multi-threading concepts to ensure a seamless user interface.
- Applied software design principles to implement standard arithmetic operations with rigorous debugging and performance testing.
- Optimized the application for reliability and ease of use, demonstrating strong engineering skills in Python development.

LICENSES & CERTIFICATIONS

1. Harvard CS50P – Introduction to Programming Using Python

Comprehensive certification covering software design, debugging, and unit testing using Python, issued by Harvard University.

2. HackerRank Problem Solving (Intermediate & Basic)

Verified proficiency in data structures, algorithms, and complex problem-solving techniques through standardized technical assessments.

3. IIT Kanpur Cybersecurity Awareness

Certification focused on systems security, data integrity, and best practices in digital infrastructure protection.
